

## Discover control, innovation, and ease

Compliance seamlessly delivers a secure, innovative, and integrated suite of discovery solutions.

Founded in 1997, we are a recognized leader in providing next-generation eDiscovery services and managed review. Over the years, we developed unique, scalable solutions that cover the entire data lifecycle. We have invested in the most advanced, widely-accepted eDiscovery tools, available as a bundled solution in our Discovery-as-a-Service (DaaS) platform, or as needed via our App Store.

## Discover DaaS

If you're seeking an end-to-end solution with some of the most advanced eDiscovery software, analytics, and data security available, DaaS delivers flexible, customized platform options such as PayGo, Subscription, or Hybrid. DaaS allows complete in-house control while eliminating capital investment, upgrades, and technical debt.

Choose from Compliance's hosted Relativity instance, RelativityOne in the cloud, or Nuix Discover, all with available integrations in our App Store.

*Prior to hiring Compliance, we were looking at a review of 2 million documents and \$1 million in review fees. By switching our eDiscovery environment to DaaS, we were able to pare down the relevant data set to less than 100,000 documents, saving us substantial time and money.*

- Corporate Enterprise Client, Internal Investigation

## Discover Apps

Compliance is proud to offer Compliance Innovations in our App Store. Compliance Innovations are customized integrations developed specifically to enhance your experience within the Relativity or Nuix platforms. Our Innovations allow for a streamlined eDiscovery process; they provide enhanced document review, insights, and accessibility unlike any other platform. Deploy one of Compliance's proprietary innovations, a third-party integration, or one of many applications available on our app store, which include:

**CI Admin:** Manage and create Relativity users, groups, matters, workspaces, and audits.

**CI Login:** Comprehensive, customizable Single Sign-On and Multi-Factor Authentication platform utilizing Okta enabling client administrators to tailor advanced security settings and gives clients a white-labeled landing page.

**CI Archive:** Archive and restore workspaces with just a few clicks.

**CI Insight:** Audit and monitor client data metrics directly from custom dashboards, with new enhancements using Microsoft's Power BI Business Analytics Tool.

**CI Click:** Single-Click Multi-Select coding shortcut tool to avoid repetitive coding clicks.

**CI Processing Pro:** Automate Nuix processing and Relativity ECA workflow with the Rampiva automation engine and Compliance's proprietary workflows

## Discover Accelerated Performance

When choosing an integrated eDiscovery technology platform for hosting and document review, it's critical for clients to think about the features and functionality they'll most likely rely on.

We provide clients with three of the most trusted and time-tested platforms on the eDiscovery market: Relativity, RelativityOne, and Nuix Discover. We have partnered with these platforms based on their extensibility, compatibility, customizability, and overall security. We have developed workflows around each solution that help clients achieve deeper insight into their data and dramatically reduce the amount of documents to review.

## Discover Productivity

Discover how Compliance brings together project management, contract attorneys, space, and computers with a focused approach and a cohesive review process. We offer:

- Proprietary review workflows that form the basis of our efficiency
- Timely tracking, reporting, and metrics
- Legal staffing driven by a powerful, national recruiting team
- Technology-assisted review based on best practices and professional expertise
- State-of-the-art document review facilities featuring customizable space configurations
- Distributed Review, a remote review option that provides national resources to collaborate in a secure virtual workspace
- Flexible pricing options, including hourly, per document, fixed fee, and more

### Distributed Review:

Distributed Review utilizes our national network of project managers and lawyers to remotely manage teams of contract attorneys on your review. With all the equipment, access, and security needed to confidently work remotely, our deep pipeline of legal professionals will tackle your project under expert supervision.

### Compliance Facilities:

Compliance offers state-of-the-art document review centers that meet the highest standards of security, quality, and efficiency. Fully wired and furnished, our production facilities allow clients to rapidly scale resources within a turnkey managed review approach.

## Discover Strength

### Project Management

At Compliance, we deliver cost-effective and defensible eDiscovery strategies for legal teams. We leverage industry-leading software and well-established workflows to allow for collaboration within our teams and yours. We help establish best practices for your eDiscovery project, no matter its size or scope.

understanding  
needs and goals

delivering innovative  
actions plans

provide open  
communication

delivering service,  
metrics, and reporting

**Review Project Management:** Compliance's seasoned project managers represent the best the industry has to offer, with collective expertise gained from having staffed, staged, and managed thousands of document reviews. They support clients in all facets of the review and production process.

**eDiscovery Project Management:** Compliance's decades of experience in all facets of eDiscovery technology offer clients a well-tuned, time-tested set of workflows and procedures to establish best practices that are logical, repeatable, and defensible.

Our client, a multinational bank, was faced with a government investigation. Compliance **reduced the data set from 10MM to just under 2MM** using just the first run of predictive coding using Brainspace Analytics. Our application of technology **resulted in an estimated \$10 million in savings** for the client.

## Discover Confidence

### Security

We make data security a top priority. It's that security, and the infrastructure, software, monitoring, and manpower behind it, that gives our clients the peace of mind required to entrust their data to a partner like us. We employ strict internal controls and monitoring, which have helped us achieve our ISO 27001 status; maintain operations at only Tier IV or higher data centers with SOC audits; mandate that cloud hosting partners maintain their own ISO and SOC status; and successfully gain industry-relevant compliance and certifications, including GDPR, HIPAA, and ITAR, to name a few.

### Forensics & Collections

Compliance understands that preservation, data integrity, and defensible chain of custody all play a central role in the forensic collection and analysis of electronically stored data. Our team of experts employ a best practices approach to identifying data through custodial interviews, ensuring proper preservation of data to avoid spoliation, and rigid procedures to preserve forensically-sound copies of storage and media.

### Governance, Risk, & Compliance (GRC)

With the explosion of data and continuous creation of new data sources and types, Information Governance expands beyond traditional records management. Compliance offers scalable solutions that can address any stage where your company may be at risk.

## Discover Knowledge

Compliance believes that successful onboarding, implementation, and training are at the cornerstone of success, particularly when it comes to DaaS. Every client that implements our DaaS platform on a subscription basis gets a customized and robust training plan. We do not take a one-size-fits-all approach when it comes to training - we work with clients individually to prepare a customized curriculum that fits their needs and expectations.

# Managed Services & Hosting Platforms

## Discover Power

If you're seeking a solution that offers a powerful toolkit of the most advanced eDiscovery software, analytics, and data security available without the capital investment, Discovery-as-a-Service ("DaaS") is the answer for you. DaaS delivers a flexible, customized PayGo, Subscription, or Hybrid Model, giving your organization the option of a self-directed or "team behind the team" eDiscovery approach. Law firms, corporate legal departments, and government/public entities are ideal DaaS users; either for their entire eDiscovery operation or just a single case. DaaS allows you to control eDiscovery in-house while eliminating constant investment in and upgrades to technology.

Discover how you can choose from Compliance's hosted Relativity instance, RelativityOne in the Azure cloud, or Nuix Discover in the AWS cloud, all with available innovations and integrations in Compliance's App Store.

## DaaS Benefits

The strength of the DaaS platform lies in its superior ability to adapt to your environment. DaaS offers customization previously unseen in the industry, making us a leading provider of eDiscovery solutions.

DaaS offers the following benefits:

- All options at a fixed, flat, all-inclusive rate—no more line item or per service/GB charges
- No software investment, but access to cutting-edge eDiscovery data processing, hosting, and analytics platforms
- No hardware investment, with data hosted in scalable and secure audited data centers
- Greater efficiency of litigation support resources by removing challenges associated with software implementation
- Unlimited data throughput and utilization, including unlimited processing and your choice of analytics tools
- Flexibility to utilize a seasoned and experienced support team (IT, Lit Support, Consultants) or your existing internal resources
- Consistency, transparency, flexibility, and cost predictability along with a standardized approach and in-depth understanding of your goals and needs
- The latest software versions, supported and delivered by a recognized best-in-service company

## Discover Advantage Through a Managed Services Approach

Compliance's DaaS platform offers greater flexibility, scalability, consistency, and cost control. Key advantages include:

- Backed by best-of-breed industry software, including Nuix and Relativity
- Complete matter control through our proprietary client management portal and customized dashboards
- Continuous upgrades and numerous customizations to streamline workflow and review
- Advanced environment analysis

## Hosting & Review Platforms

When choosing an integrated eDiscovery technology platform for hosting and document review, there are many options and considerations. Each platform is unique and has its own strengths – and it's critical for clients to think about the features and functionality they'll most likely rely on in any matter or across their enterprise.

### Discover Accelerated Performance

Compliance provides clients with three of the most trusted and time-tested platforms on the market. These platforms truly represent the innovation and ingenuity, flexibility, and scalability that eDiscovery requires. We've partnered with these platforms based on their extensibility, compatibility, customizability, and overall security. We have developed workflows around each of these solutions that help clients achieve deeper insight into their data, promote fewer documents to review, and circumvent burdensome processes. Compliance backs each platform with expertise in workflows, processing, and analytics to help you succeed.

**Relativity:** Relativity simplifies and accelerates how the world conducts eDiscovery by bringing the entire process and community together in one open, flexible, and connected platform. Through customizations and integrations, Compliance has extended the platform's capabilities to give clients a truly unique experience, from two-factor authentication and single sign-on to various administrative privileges that give you control and ease of use. Relativity continues to be the gold standard in eDiscovery, used internationally by many of the world's top law firms and largest corporations as their primary eDiscovery tool.

**RelativityOne:** Leveraging iron-clad security, global reach, the best performance, and the ability to innovate faster, Compliance's RelativityOne instance helps you gain a competitive advantage. RelativityOne represents the future of eDiscovery and harnesses the Azure cloud to give clients the speed, security, and control they need to tackle complex matters efficiently. Compliance has integrated its DaaS solution into RelativityOne for ease of access and control, along with new cost saving storage options and workflow automations.

**Nuix Discover:** By leveraging the performance, scale, and security of the AWS cloud, Nuix Discover helps tackle the complexity and scope of today's matters by uncovering evidence faster and integrating legal strategies. Compliance's Nuix Discover platform transforms raw data into meaningful information. Visual analytics reveal the critical details in every project and reduce the complexity and time spent in document review. Machine learning uses proven algorithms to learn and assist with the decision logic of your subject matter experts. This smart, intuitive, and integrated review platform helps teams speed through document sets and reduce costs of review.
